NEWSLETTER

March 2012

Although we have been experiencing spring-like conditions for some time, the spring season is fast approaching. Our crews have been performing routine cleanup responsibilities, and repairing any damages incurred due to snow removal. We will begin spring pruning and trimming services as well as applying dormant oil to deciduous shrub, aerating turf areas, and edging mulch beds as the weather permits.

We at Nogas are anxiously awaiting any new projects or services that we can address. We encourage any suggestions or input regarding how we may better service your properties. Please contact us with anything that you would like us to address. As always, we appreciate your business and look forward to another successful season.
