SPRING 2013 NEWSLETTER

Dear Valued Client,

Spring is almost upon us, and Nogas Landscaping is looking forward to servicing your Association in the upcoming season. As weather permits, the crews will be on the properties performing preseason services. These services will include the application of dormant oil on woody shrubs, cutting bed edges, and core aerating the turf. All properties will receive an initial fertilization application, containing a pre-emergent herbicide, for crabgrass. Furthermore, the time to most effectively combat apple scab in ornamental crabapples is fast approaching. Treatment for apple scab requires a minimum of two fungicide applications and is available at an additional cost. Many lawns and plants have become stressed due to the drought and mid winter seasons. Common stresses are discussed in detail on the following insert. This is why it is vital to the health of the lawns and plants to set up a spring walk through of your property. Please contact Dave or Mike to perform the necessary walkthrough. A walkthrough will not only allow us to assess the property so that we may best care for it, but it will give you, the client, an opportunity to discuss any new ideas for landscaping design or concerns regarding landscape maintenance. Customers can schedule the walkthroughs by contacting Dave or Mike directly, or through the office at 815-462-4475. We appreciate your business and are looking forward to providing quality service to your property in the upcoming season.

Sincerely,

NOGAS LANDSCAPING

Dave Noga
